# Bringing L'art de Vivre Home

Photos by Carmel Brantley and Jerry Rabinowitz

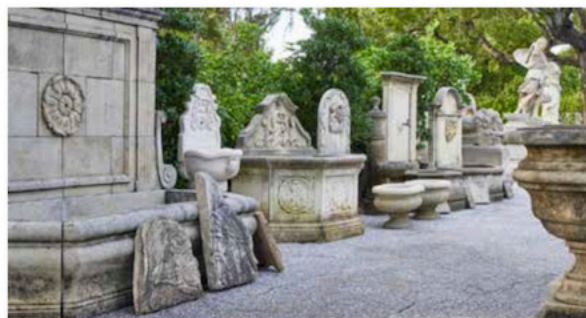

**A**uthentic Provence now has two new galleries at 6100 Georgia Avenue, West Palm Beach. 45,000 square feet of magnificent gallery space dedicated to offering monumental European antiques for homes and gardens, and an adjacent gallery, AP Mid Century Modern, featuring original 20th-century European furniture, lighting, and paintings from Italy, France, Scandinavia, and the United States.

The gallery is one of the largest interior design resources in the country for premier European antiques and furnishings with large-scale limestone tables, fountains, statuary, planters, and antique and original imported floors. With an expansive deep green facade, the gallery and gardens are an immersive experience in French, Italian, and Scandinavian antiques. Flanked by impressive exterior courtyards reminiscent of the French countryside, their new space offers a backdrop to tell the story, history, and artistry behind each special piece. Located next door, AP Mid Century Modern introduces period furniture collections, celebrating Europe's mix of stylistic influences.

Founded and owned by Susan and Wolfgang Hofherr, who select each piece based on its authenticity, craftsmanship, quality, and distinctiveness, the collection has been curated over many decades. Pieces are offered that are the hallmark of French and Italian culture, dating back to the 18th century. As one wanders the gallery, prepare to be amazed by the breadth of offerings, from Gustavian period objects to a French bar of extraordinary scale, from a hand-carved marble table to a Parisian bistro table, and from extra-large antique Lebrillo bowls to the renowned collection of imported garden urns in a vast array of finishes, sizes and colors. Treasures include antique flooring directly from France and Italy for indoor and outdoor use, hand-carved limestone statues and fountains, and garden furniture, both antique and representing the very best of new hand-crafted furniture collections from Europe.

Both galleries will offer an educational, entertaining schedule of talks and events with leading design and industry luminaries.

*"Our vision has been realized in what has been many decades of work for Wolfgang and myself that would allow for us to share an authentic European lifestyle that we have built in an atmosphere that is worthy of the works of art we have so carefully collected."*

-SUSAN HOFHERR
